Clinics & Services at NOHC

The Department of Orthopaedic Medicine

The National Orthopaedic Hospital Cappagh serves the people of Ireland, providing a national orthopaedic service for the treatment of lower and upper limb and spinal surgery. The Hospital has the largest concentration of orthopaedic expertise in the country, bringing together the skills, knowledge and diverse subspecialty expertise to deliver cutting-edge treatments.

Cappagh Kids

At Cappagh Kids, we diagnose and treat children from 2 years - 16 years for congenital, acquired and degenerative conditions, including Club Foot, Hip Dysplasia, Perthes and Scoliosis. In addition, our specialist Limb Reconstruction Team provides treatment for patients with limb deformity and limb lengthening services for children with unequal limb length and Achondroplasia. Cappagh Kids is working in conjunction with CHI to reduce Hospital waiting times and improve access to care for young people with musculoskeletal conditions.

Bone Tumour Centre

The Bone Tumour Centre at NOHC is the National Patient Referral Centre for Bone and Soft Tissue Tumours. Our specialist team is represented on the National Sarcoma Service multidisciplinary team (MDT), providing advice for best practice tumour biopsy to national orthopaedic surgeons, and performing the biopsy and surgical resection of complex tumour masses.

Rheumatology

Our Consultant Team at the National Orthopaedic Hospital Cappagh offer whole person treatment plans, effective pain management and expert advice for patients with rheumatological conditions.

Sports & Exercise Medicine

The Department of Sports & Exercise Medicine is dedicated to diagnosing, treating, and managing conditions that affect sports participation and performance. We provide services for recreational athletes who choose a sport for fitness and fun and professional athletes who compete to win at club, national and international levels. Doctors in Sports and Exercise Medicine work collaboratively with Clinical Specialists in Musculoskeletal Physiotherapy to deliver this service.

The Referral Process

- > You can refer patients using the Healthlink secure messaging platform. We accept open referrals (Dear Doctor) and named referrals for specific Consultants.
- > Open or "Dear Doctor" referrals are assigned to the shortest waiting list and receive the earliest possible appointment.
- > Specific Consultant referral appointments are determined by that Consultant's waiting list and Consultants with multiple specialties may have long waiting lists.
- > Healthmail Link to follow

Please note that several Consultants operating at NOHC hold outpatients clinics at another hospital. The Consultant Directory lists outpatient clinic locations. Referrals should be sent to NOHC, and patients will receive a letter detailing the location, date and time of their first appointment.

HIQA NIES Ranking
Ranked First for Overall Patient Experience, HIQA National Inpatient Experience Survey 2021 and 2022.

Patient Referrals can be sent by:

Post: National Orthopaedic Hospital Cappagh
